How Our Class Will Build a Better World...12

Community Partners...13

WELCOME

On your class's tour of Noah's Ark at the Skirball, you and your students will bring to life one of the world's most well-known stories—that of people and animals experiencing a great flood, creating shelter and community, and finally seeing a rainbow, a symbolic second chance to preserve and improve the world. Storms, Arks, and Rainbows are the “chapters” of our Noah's Ark exhibition. By working together and caring for each other, your class will experience the values of weathering life's storms and building a better world.

BIG IDEAS

collaboration
community
creativity
diversity
recycling
responsibility
second chances
sharing
stewardship
storytelling

Connect with Community Partners

To learn more about planning your trip to the Skirball, visit skirball.org/plan-your-school-visit or e-mail education@skirball.org.

WHAT TO EXPECT

Before you arrive at the Skirball, familiarize your students with what they can expect during each of the three chapters of Noah's Ark.

Storms

Listen and look for changes in the weather. The animals know a great storm is coming, and they are moving to find a safe place.

- Divide students into three groups: Elephants, Owls, and Coyotes.
- Work together to create the storm.
- Collaborate to help finish building the ark.
- Load up the animals two by two.

Arks

It is time to get on board the Ark! So move on in, unpack, and explore.

- Climb into the crates to see what the animals are taking on their journey.
- Bring the animals to life using puppetry.
- Work as a team to keep the community clean, safe, and peaceful.
- Comfort the animals by cleaning up, feeding, and taking care of them.

Rainbows

The storm has stopped, and the land is dry. You made it! Look for a sign of hope in the sky. Now is the time to celebrate, innovate, and make the world better together.

- Celebrate the journey by making music with instruments from cultures all over the world.
- Move like the animals under the rainbow.
- Continue making our world a better place!

LESSON PLAN: COMMUNITY COUNCIL

Tour Connections: This lesson can be used either prior to your Noah’s Ark school tour or after to reflect on the themes and activities explored during the tour in the classroom. During the Noah’s Ark school tour, your class will embark upon a journey featuring three chapters: Storms, Arks, and Rainbows. Each chapter introduces a different concept, from working together to overcome life’s challenges, to learning to live as a community, to building a better world. During the tour, students might participate in “council,” a community-building, listening, and speaking activity used to reflect on tour themes and share experiences.

Big Ideas:

collaboration
community
sharing
storytelling

Objective: Introduce the concept of council: a powerful social and emotional learning strategy that promotes an environment of trust and respect in the classroom. Council is a mindful practice that invites students to share personal experiences, memories, and feelings with each other by actively listening and speaking honestly. Council helps students become more aware of themselves, while also establishing connections and appreciation of differences among their peers.

Set-Up and Materials: On the floor, create a space that is open, nurturing, and without interruption, where students can sit together in a circle. In the center, place a meaningful object to be used as a talking piece.

Instructions:

- Students and teachers will sit in a circle. The facilitator will present the talking piece and explain that only the person holding the talking piece may speak, while everyone else will listen.
- The facilitator will share the council agreements: that the students will speak and listen from the heart, be respectful of one another, and keep an open mind.
- The facilitator will give a council prompt that allows students to make personal connections to the Noah’s Ark tour concepts and themes. For example, “Share a time when you made a new friend.” Students will have a moment to think of a story, and then they will be asked to share by using one sentence once they receive the talking piece. (Note: The response can be modified for different age levels; students can share one word or phrase, or briefly retell the story.)
- At the end of the sharing round, the facilitator will point out the similarities or diversity in students’ stories. For example, “I heard many different ways of making friends in your stories—over a meal, on the playground, by helping one another, etc. The animals on Noah’s Ark might have also made friends at meals, while playing, and working together.” These connections allow students to get to know their classmates better while also understanding the context of the Noah’s Ark story. Council can also be used in the classroom to better understand course content and/or to resolve conflict.
- End your council with a closing gesture (e.g., a group thank you, cheer, or moment of silence).

Vocabulary:

Talking piece: A meaningful object passed around between participants to identify whose turn it is to speak.

Council agreements: Guidelines that all participants promise to keep during the exercise, such as speaking from the heart, listening with the heart, being respectful and open-minded, and keeping answers as short as possible.

Council prompt: A simple instruction to encourage participants to reflect on the past, express themselves in the present, and view the future. Prompts often begin with phrases like “Tell the council about a time when ... ” or “Tell a story of a time ... ”

Sample Prompts:

Storms

- “In one word, tell council about a time when you experienced a storm.”
- “Tell a story of a time when you had to do something that was challenging or difficult.”

Arks

- “In one word, share a story about when you made a new friend.”
- “Tell council about a time you went on a trip.”

Rainbows

- “In one word, tell council about a time you celebrated something.”
- “Share a story about a time you celebrated someone else.”

Reflection: Council can be followed by an art project or physical activity to further explore the stories and experience students shared. Drawing, painting, and movement activities give students opportunities to express their thoughts and experiences of council in other ways.

For more information on using council in the classroom as well as additional lesson plans, visit councilinschools.org, provided by [The Ojai Foundation](http://TheOjaiFoundation.org).

LESSON PLAN: BUILD A BETTER WORLD

Tour Connections: Following your Noah’s Ark school tour, this lesson will invite students to think in greater depth about how individuals and communities make an impact on the world and one another and what they specifically can do to build a better world.

Big Ideas:

collaboration
creativity
responsibility
stewardship

Objective: Students will brainstorm with their classmates about problems they would like to solve in the classroom, school, or community. Teachers will help weigh the importance, feasibility, complexity, and impact of a variety of ideas in order to choose which one they will collectively work on.

Set-Up and Materials:

- “Kids in Action” service learning article
- “Build a Better World Brainstorm” handout
- “How Our Class Will Build a Better World” handout

Instructions:

1. Ask students to share what they remember from the Noah's Ark school tour. Facilitate an open discussion about the many ways they were able to help each other and the animals while on the tour.
2. Share some of the highlights from the "Kids in Action" service learning article, which showcases local schools and student-created service learning projects.
3. Discuss with your students how they would like to build a better world. Brainstorm what issues they are interested in addressing. The following are potential areas where your students can make an impact:
 - helping others and showing kindness (sending postcards of positivity or notes of gratitude to parents/grandparents or initiating a donation drive of books, clothing, food, etc.);
 - taking care of the environment (recycling, cleaning up the beach, planting a garden, etc.);
 - helping animals or wildlife (raising awareness or supporting local organizations);
 - making the classroom or school more beautiful in big or small ways.
4. Provide students with the "Build a Better World Brainstorm" handout and give them time to write and draw one idea for a project that will help build a better world.
5. As a class, choose one project to do together and fill out the "How Our Class Will Build a Better World" handout.
6. Set a deadline, and build a better world!

Reflection: Ask your students, "Why is it important to [help others/take care of the environment/comfort animals/etc.]" Discuss how their actions are making a difference.

We always love seeing the impact of the Noah's Ark tour and the ways your students continue making our world a better place. Feel free to share photos, videos, student writing and drawing, or other projects by e-mailing buildabetterworld@skirball.org.

KIDS IN ACTION

The Noah's Ark Build a Better World school program teaches our youngest visitors about empathy and civic responsibility. Each Grade 2 school tour includes a service-learning project focused on one of three themes: helping people in need, taking care of the earth, or comforting animals. Teachers and students then return to their classrooms and create a project of their own. Read on to find out how participating schools helped build a better world!

Buchanan Street Elementary

Second grade students at Buchanan Street Elementary sold candy grams for fifty cents apiece throughout the month of February 2018. In total, they raised \$300 to donate to the [Pasadena Humane Society!](#)

Beethoven Street Elementary

Beethoven Street Elementary first graders helped beautify their campus by creating a welcome banner for their auditorium and maintaining their community garden. They further shared their artistry by creating birthday cards for a local senior center.

Budlong Avenue Elementary

After seeing the repurposed materials used to create the animals aboard Noah's Ark, first graders at Budlong Avenue Elementary created their very own upcycled animals out of items from home. Students then wrote a narrative story, informative article, and opinion piece about their animal.

Clover Avenue Elementary

Four second-grade classes at Clover Avenue Elementary led a school-wide sock drive, donating more than 180 pairs of socks to [Chrysalis](#), a nonprofit dedicated to helping homeless individuals find and retain employment. Students also created "postcards of positivity," filled with messages of encouragement and support for Chrysalis participants.

Shirley Avenue Elementary

Shirley Avenue Elementary second graders raised money to adopt AJ the dolphin from the Dolphin Research Center in Florida. This money will provide food, medical care, and maintenance of its beautiful seawater habitat.

Clover Avenue Elementary

Woodlake Avenue Elementary

First grade students at Woodlake Avenue Elementary created “comfort bags” for families at LA Family Housing. Students filled these bags with donated hygiene items and decorated them with messages of hope and encouragement. Read more about this project and LA Family Housing [here](#).

BuFord Elementary

BuFord Elementary first graders studied the environmental impact of plastic straws and created posters to educate their peers, families, and school district. They even made a presentation to the district head of Child Nutrition Services, who pledged to reduce the amount of plastic bags and straws at their school!

Farragut Elementary

Farragut Elementary first graders continued their efforts to help others by sending letters of appreciation to members of the United States military serving in Afghanistan.

Edison Language Academy

As part of their Kindness and Justice Challenge, second graders at Edison Language Academy made Valentine’s Day notes for **The People Concern** in Santa Monica, an organization that provides services to people experiencing homelessness. Staff from The People Concern visited their classroom to share information about homelessness in their community, and students further explored ways they could support people in need.

Tarzana Elementary

Inspired by the animals aboard Noah’s Ark, second grade students from Tarzana Elementary collected plastic water bottles and aluminum cans. By recycling these items, they raised thirty dollars to donate to the Monterey Park LAMP Optimist Club’s disaster relief fund.

Grant Elementary

Grant Elementary students learned the importance of native plant species after visiting the **Theodore Payne Foundation**. Using California poppy seeds, they made *nendo dango* (Japanese for “seed balls”) to cover the hillsides of the Theodore Payne Foundation. Students also created handmade signs adorned with messages of why it is important to take care of our Earth.

Norwood Street Elementary

Norwood Street Elementary first graders made cat and dog toys from recycled materials, such as baby socks filled with catnip and plastic water bottles. Students delivered these creative toys, along with donated supplies, to the animals at the South LA City Animal Shelter.

BUILD A BETTER WORLD BRAINSTORM

Name:

My idea for building a better world is:

Here is a drawing of what I will do to make the world a better place:

A large, empty rectangular box with a dashed pink border, intended for a drawing.

HOW OUR CLASS WILL BUILD A BETTER WORLD

We, the students of

[name of teacher(s)]

From

[name of school]

have this goal to help make the world a better place:

We have these ideas for getting started:

1.

2.

3.

COMMUNITY PARTNERS

Children's Hospital Los Angeles | chla.org

Dating back to 1901, Children's Hospital Los Angeles is the first and largest pediatric hospital in Southern California. CHLA provides compassionate patient care, leading-edge education of the caregivers of tomorrow, and innovative research efforts that impact children at their hospital and around the world.

Chrysalis | changelives.org

Chrysalis is an LA-based nonprofit organization dedicated to creating a pathway to self-sufficiency for homeless and low-income individuals by providing the resources and support needed to find and retain employment. Since 1984, Chrysalis has served more than 58,000 low-income and homeless individuals.

Heaven on Earth Society for Animals | heavenlypets.org

Heaven on Earth aims to improve quality of life for homeless cats, particularly those who are often overlooked because of special needs and who may have a low potential for adoption.

K9 Connection | k9connection.org

K9 Connection's programs offer teens in continuation high schools the chance to break through learning and life barriers by training and bonding with homeless dogs. Experiential learning enables the teens to build self-esteem, self-determination, and empathy while they in turn enable homeless dogs to develop the skills to be adopted into permanent loving homes.

LA Family Housing | lafh.org

LA Family Housing helps people transition out of homelessness and poverty by providing a continuum of housing enriched with supportive services. Since 1983, LAFH has become one of the largest comprehensive real estate developers and homeless service providers in Los Angeles and a regional leader providing solutions to end homelessness.

San Fernando Valley Refugee Children Center, Inc. | noestassolonorthhills.org

San Fernando Valley Refugee Children Center welcomes unaccompanied children from Central America seeking refuge in the United States, and offers hope and healing in the form of legal assistance, emotional support, tutoring, and other resources to help meet the basic needs of these children.

Theodore Payne Foundation | theodorepayne.org

The Theodore Payne Foundation for Wild Flowers and Native Plants Inc., established in 1960, is a nonprofit organization dedicated to the understanding, preservation, and use of California native flora. Open to all, TPF is one of the longest-running educational, environmental organizations in Southern California.
